

RLAAN

-COLOR: DEEP REDS, PURPLES
GOLD FOR SOME TRIM.

-RIPPED ARMOR LIKE A SHELL-
FISH OR INSECT.

-THEY HAVE A COAT OF THICK
RESINOUS SUBSTANCE THAT
COVERS THEIR SHIPS FOR
ADDED PROTECTION.

-COCKPIT IS BURIED IN THE SHIP
THEY DONT USE WINDOWS
ONLY MONITORS FOR SEEING.

RLAAN

SHIZU

RLAAN

SHEILD EMITTERS

THESE ARE THE DEFENSE
OF THE RLAAN SHIP.
THEY SHOULD LITTER
THE SHIPS. THEY ARE
MADE OF A
GLASS-LIKE PEARL
MATERIAL AND
EMIT A FAINT
PURPLE GLOW.

SHIZU

RLAAN

FINS

THE RLAANS USE THESE FINS FOR MANY PURPOSES, THEY ALWAYS HAVE TONS OF EMITTERS ON THEM. THE ALSO ARE MOST LIKELY TO BE A MAIN AESTHETIC OF THEIR SHIPS.

SHIZU

RLAAN

ARMOR

THICK PANNELS THAT ARE RIBBED TOGETHER. THEY LOOK VERY INSECT LIKE. NO BOLTS OR SCREWS VISABLE. THEY PREFER ROUNDED EDGES, WITH SHARP SPINE LIKE PROTRUSIONS.

SHIZU

RLAAN

REACTOR

IT'S A BULBOUS PEICE OF THE SHIP. SURROUNDED IN METAL PANNELS FOR PROTECTION. IT USSUALLY ALWAYS HAS THE MAIN THRUSTER CONNECTED STRAIGHT TO IT FOR POWER. IT HAS SOME OF THE LARGEST EMITTERS ON IT AS WELL.

SHIZU

RLAAN

MAIN THRUSTER EMITTER

IT IS THE MAIN POWER TO MOVEMENT. ALMOST ALWAYS CONNECTED TO REACTOR. EVEN THOUGH ALL EMITTERS CAN GIVE OFF SOME TYPE OF THRUST THEY ARE MENT TO STEER, WHILE THE MAIN THRUSTER IS THE PUSH AND SPEED. THE RINGS ARE A WAY TO REGULATE ALL THE ENERGY IN THE THRUSTER.

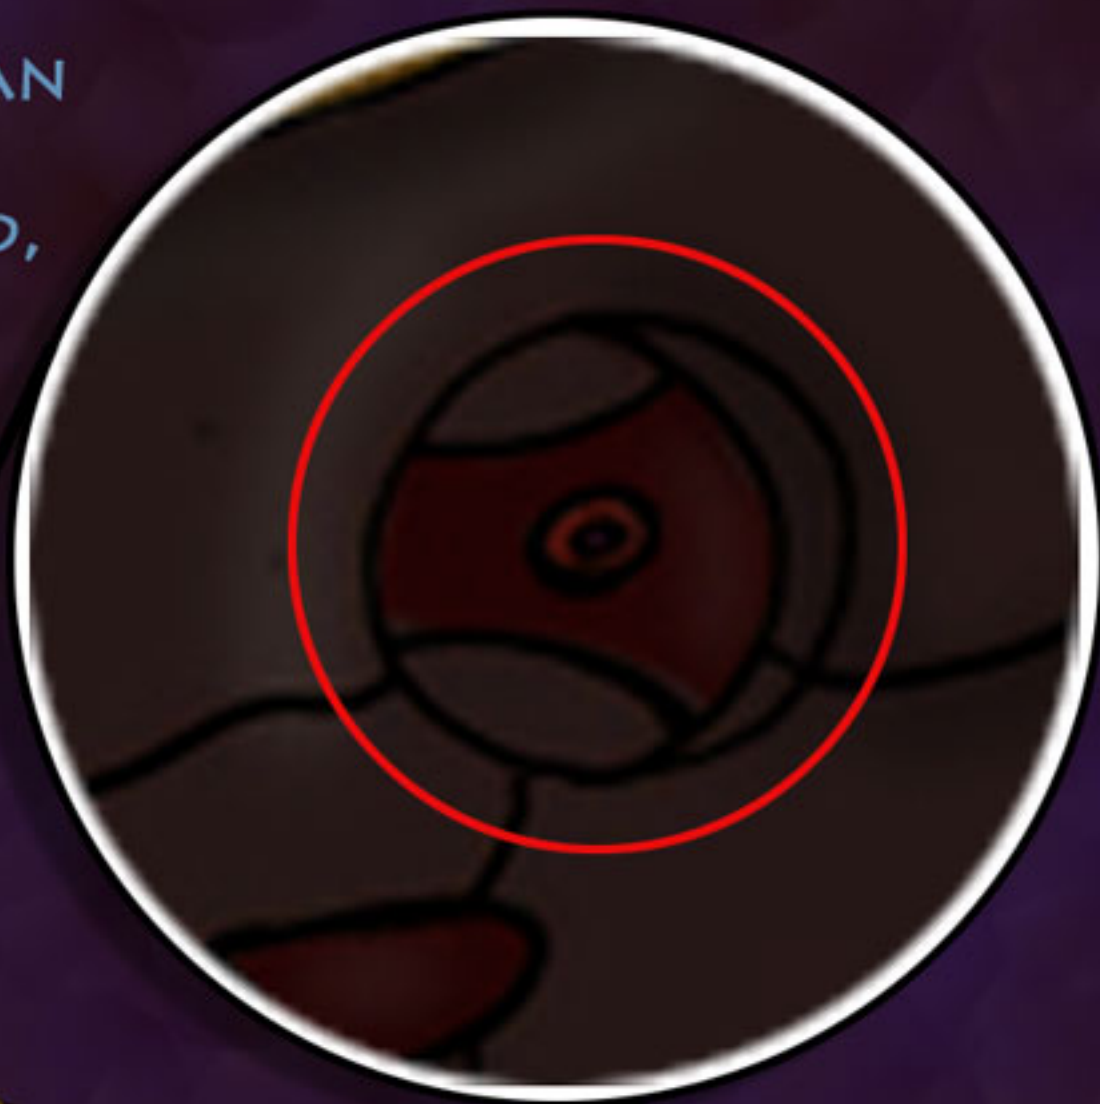

SHIZU

RLAAN

PROBE

THIS IS LAUNCHED AND CAN DO TWO THINGS, 1. SCAN AREA AND BE A VISUAL AID, OR 2. PUT OUT A SIGNAL TO ENEMY SHIPS TO MISS LEAD THEM. THEY ARE ROUND ORBS WITH TINY RINGED EMITTERS FOR VERY LIMITED MOBILITY.

SHIZU

RLAAN

ANTENNA

FOR SENSORS/SIGHT.
THEY CAN BE VERY
METALIC AND STIFF,
LIKE THE GREEN
ZOOM-IN. OR VERY
LOOSE LIKE A WIRE
BUT, VERY THICK
WIRE, I ALMOST
THINK THEY
SHOULD LOOK LIKE
LONG CAT-FISH
WHISKERS.
